A custom script was implemented to automatically retrieve university images from Wikipedia, using smart keyword matching and fallback logic to ensure relevant and high-quality visuals for each entry.

Automatical

Image seeking

Open source images

To enhance visual content, we built an automated tool that locates and fetches representative images from Wikipedia, enriching each university profile with minimal manual input

```python
def get_wikipedia_info(university_name):
  search_url = f"https://en.wikipedia.org/w/index.php?
search={university_name.replace(' ', '+')}"
```

Thank You
